DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 13-15, and 17 are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: Hoory et al. (US 6785649) disclose a voice data generation unit configured to generate voice data from the voice (*col. 5, lines 14-17, microphone converting speech signal into electrical signal or voice data*); a text data generation unit configured to generate text data indicating a content of the voice data, based on the generated voice data (*steps 32 in figure 5, generating text based on input voice data*); wherein the generated text expressing the characteristics of the voice data (*figure 3*). Hoory et al. fail to specifically disclose a division information generation unit configured to generate division information used for dividing the text data into a plurality of linguistic units each of which is characterized by a linguistic form; a reproduction information generation unit configured to generate, as reproduction information concerning reproduction control of the voice for each of linguistic units, information indicating a probability with which preset ones of the linguistic units are combined in a preset order; and a voice reproduction controller which selects, from the linguistic units, combinations of linguistic units each having a probability lower than a preset value, based on the reproduction information and the division information, and controls reproduction of the voice data corresponding to the selected combination. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify Hoory et al. in order to the claimed invention. Therefore, claims 1-3, 13-15, and 17 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
